

## **Heating Engineer**

### **Marshall and McCourt Plumbing & Heating Contractors Ltd**

Marshall and McCourt specialise in heating and renewable energy installations and are looking to add an additional engineer to their ever-growing team due to long term expansion plans. Experience in Air Source Heat Pump installations is desirable, however a comprehensive training programme would be provided to the right candidate, with previous gas heating installation experience, to develop the necessary skills and additional renewable energy qualifications required.

A range of benefits will include a competitive salary, bonus scheme, a company van, uniform, pension and 32 days holiday inclusive of bank holidays and Christmas shutdown period.

#### **Your responsibilities will include:**

- Air Source Heat Pump installations
- Wet heating distribution systems which could include underfloor heating or radiators.
- Commissioning of equipment
- Unvented hot water tank installations
- Completion of required commissioning documentation
- Opportunity to train and support the team with Ground Source Heat Pump, Biomass, Solar Thermal and Solar PV installations to enhance your experience and competencies

#### **The following skills and expertise will be advantageous:**

- Plumbing & Heating qualifications such as City & Guilds and NVQ's
- Unvented hot water G3 qualification
- Logic L3 Heat Pump qualification preferable but not a requirement
- Minimum 5 years previous experience of installing heating systems.
- Full UK Driving Licence
- Own hand tools and cordless drills
- Self-motivated to complete each project on time and to high quality standard
- Excellent customer focus and care skills
- Ability to work effectively and positively as part of a team.

You will be joining an ambitious business that prides themselves on being reliable, progressive, and forward-thinking. Their diverse and comprehensive approach has seen them become recognised as experts in the renewable energy and heating sectors.

#### **Remuneration:**

- 32 days annual leave (including of bank holidays and Christmas shutdown)
- Bonus scheme
- Contribution occupational pension scheme
- Larger equipment supplied along with company uniform and tablet.
- Fortnightly pay
- Training opportunities
